

# Yellow Comet Headquarters instructions

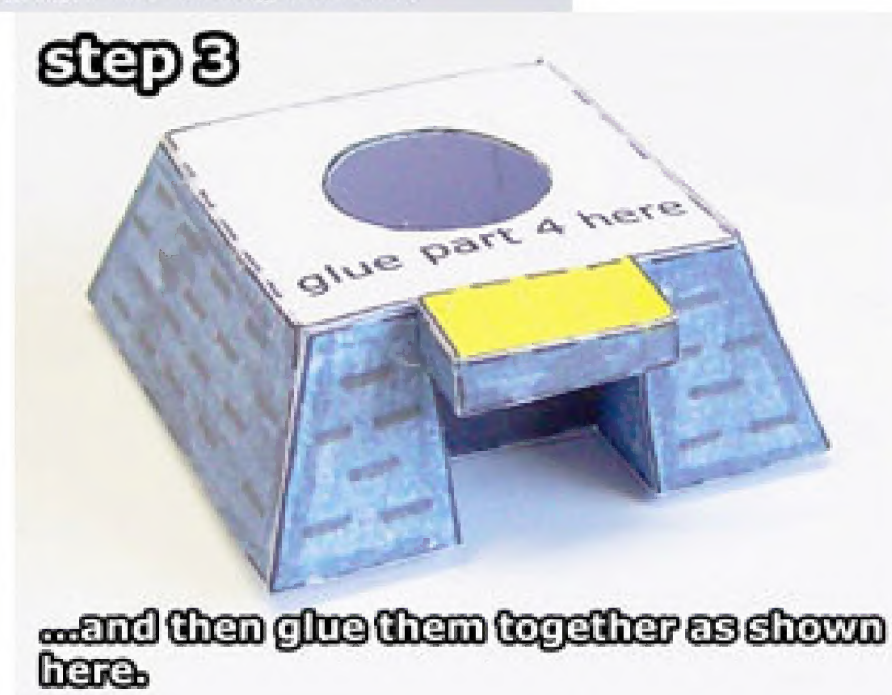

## step 1

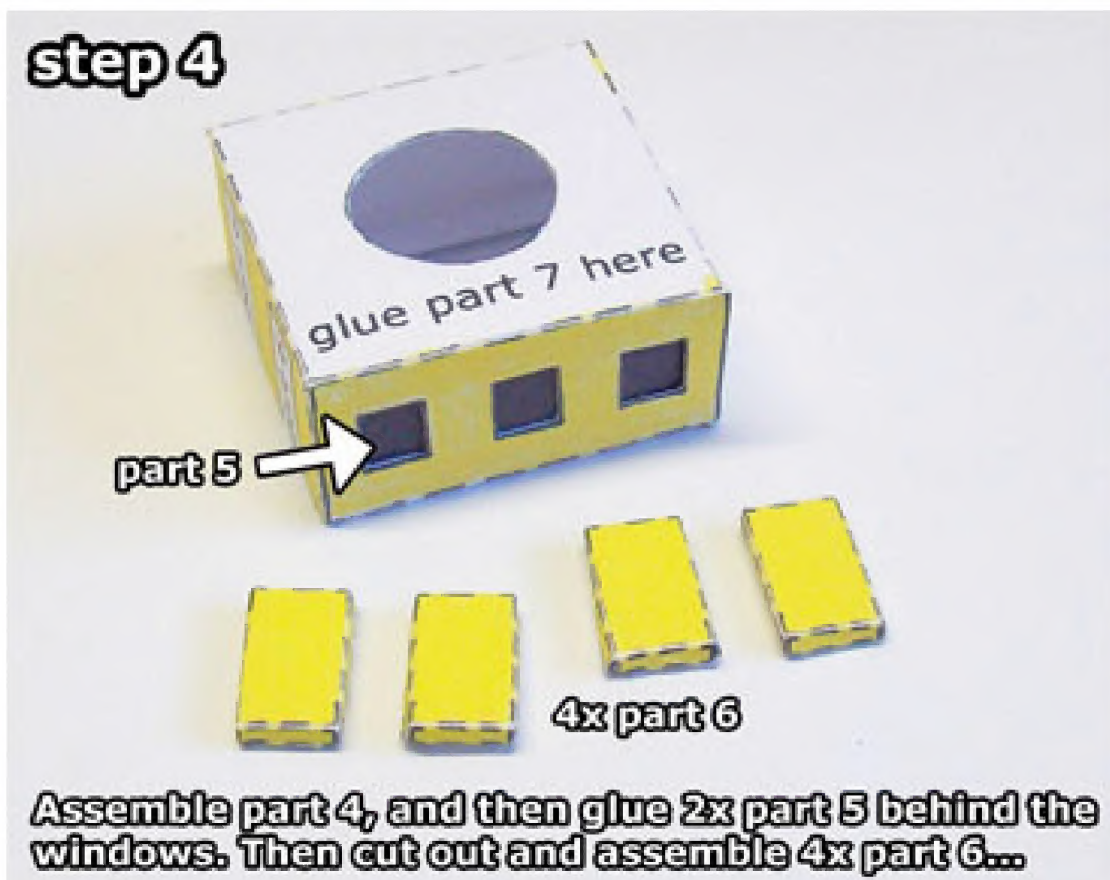

## step 2

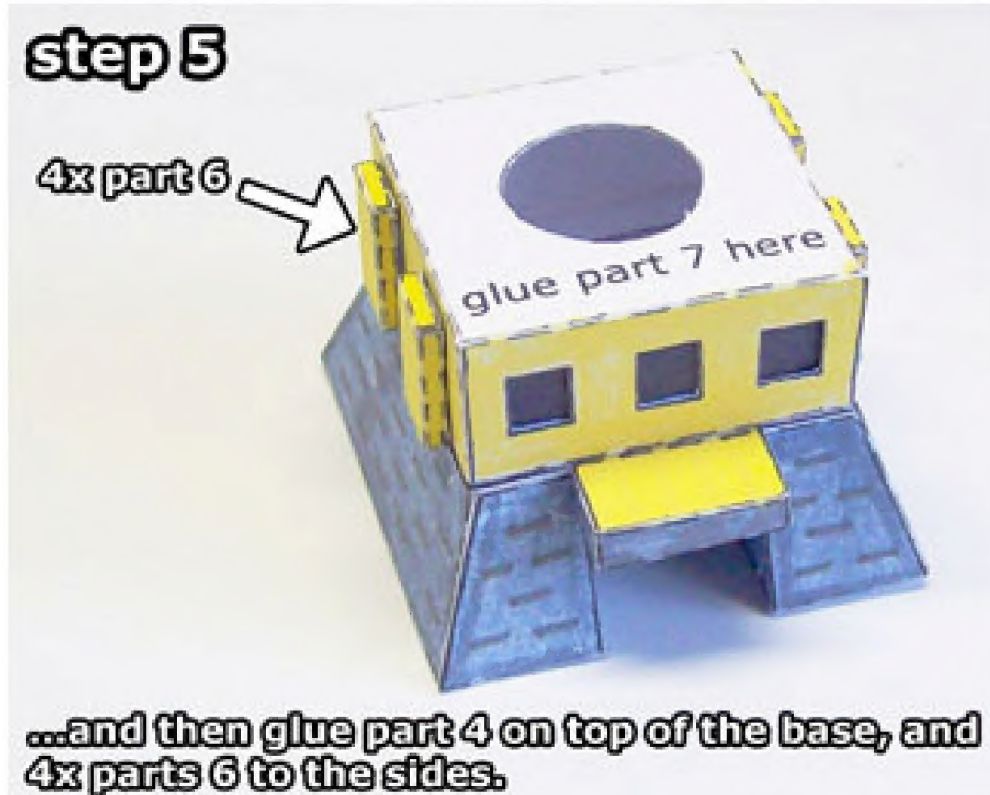

## step 3

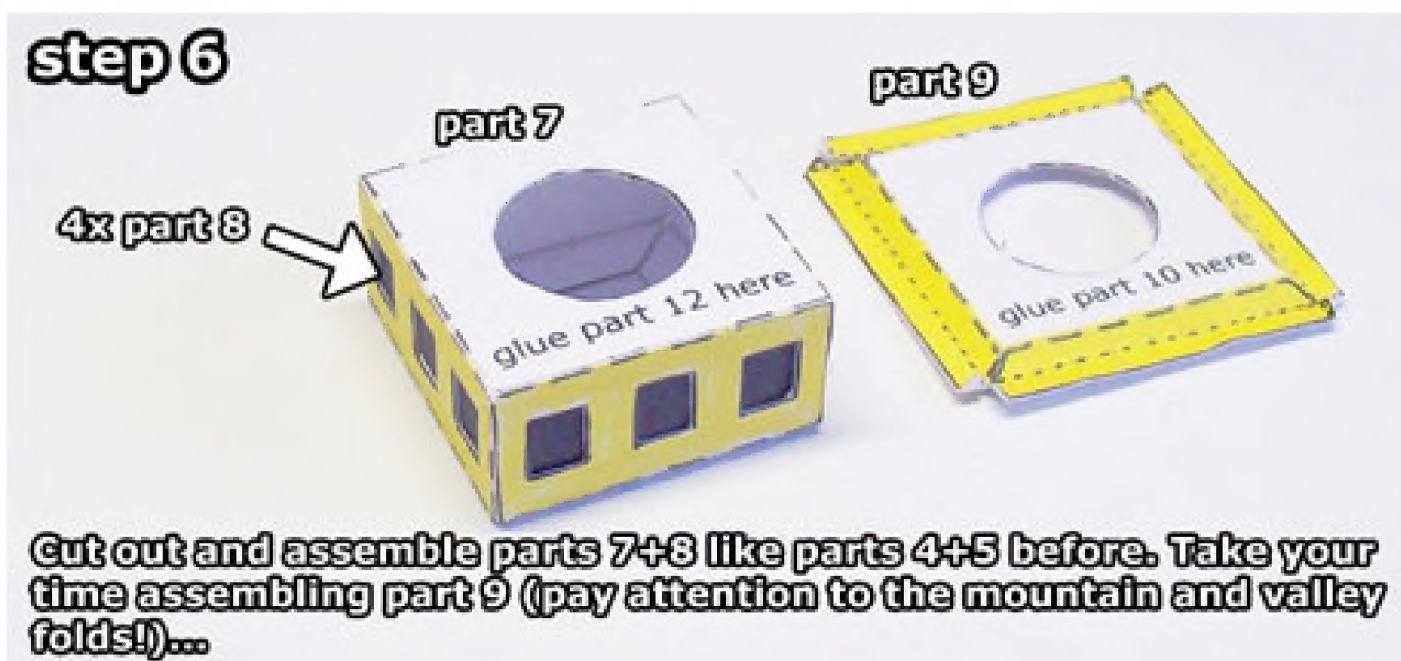

## step 4

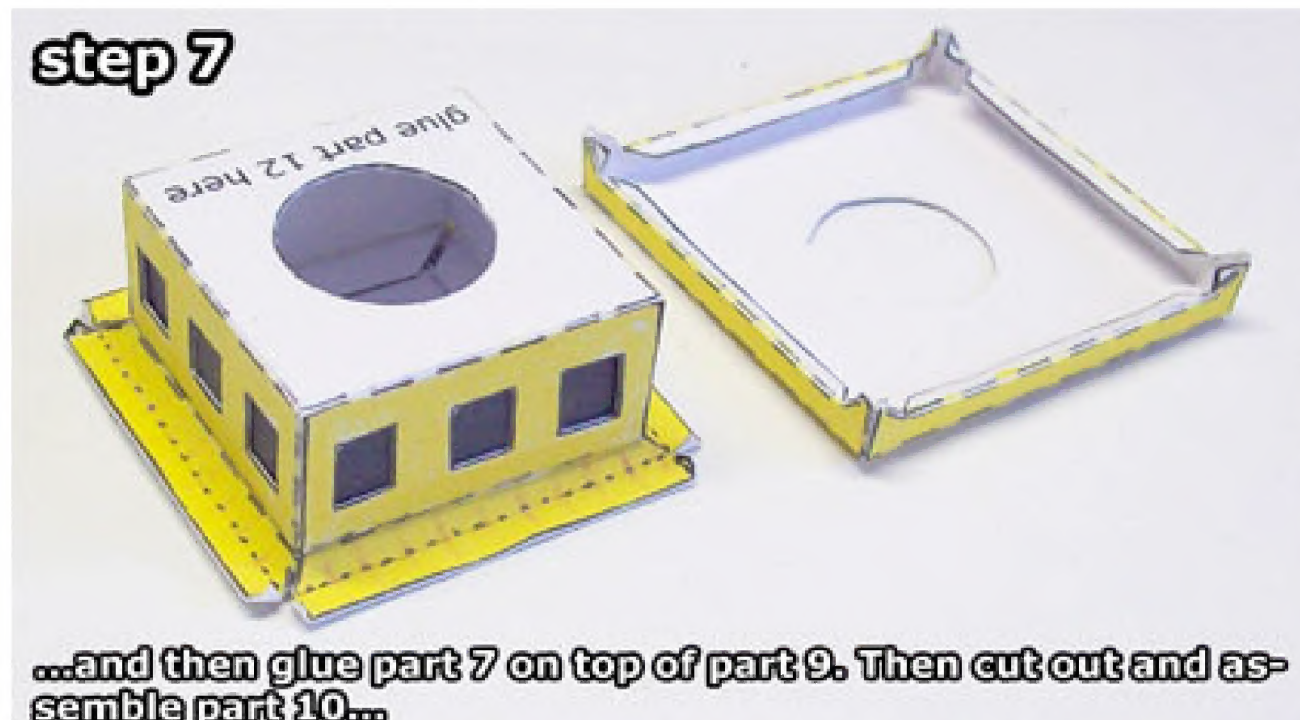

## step 5

## step 6

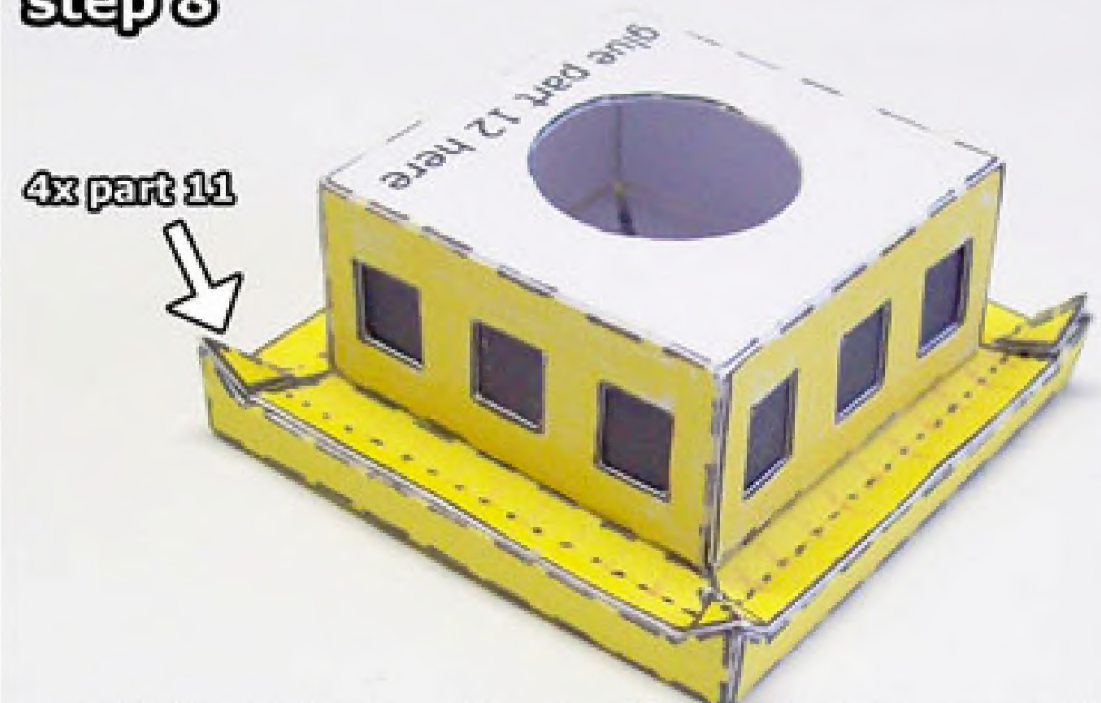

## step 7

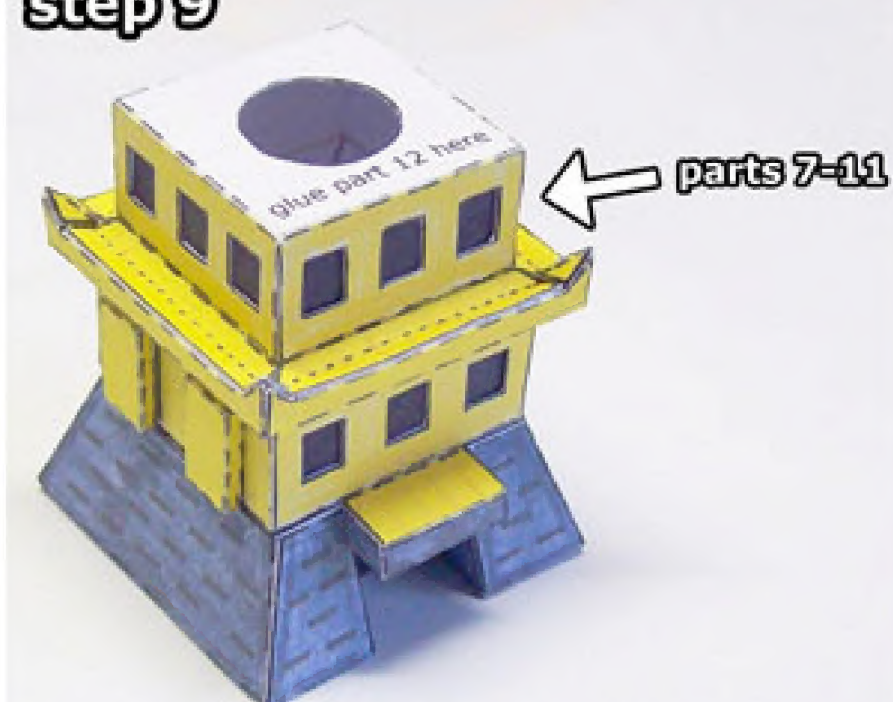

### step 8

...and then take your time to glue parts 7-9 on top of part 10, and 4x part 11 to the cornerpoints.

### step 9

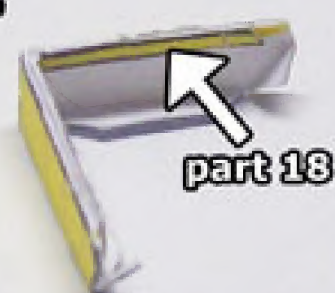

Now glue parts 7-11 on top of part 4.

### step 10

Assemble parts 12-16 the same way as parts 7-11 (make sure you align the marked spots on parts 12 and 14 as shown here).

### step 11

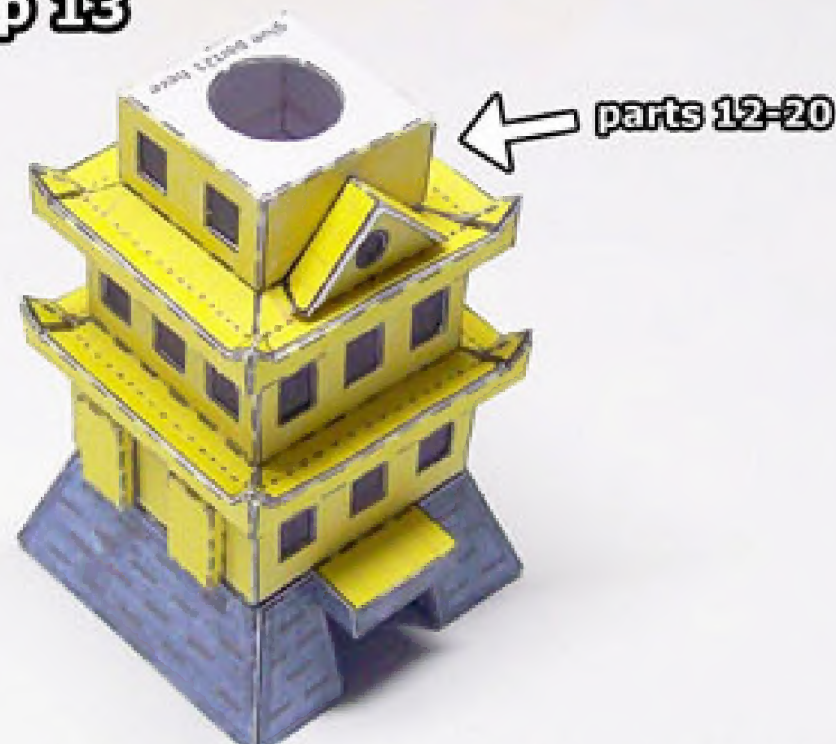

Fold part 17, and then glue part 18 to the underside, along the edge without the glueing flaps as shown here.

### step 12

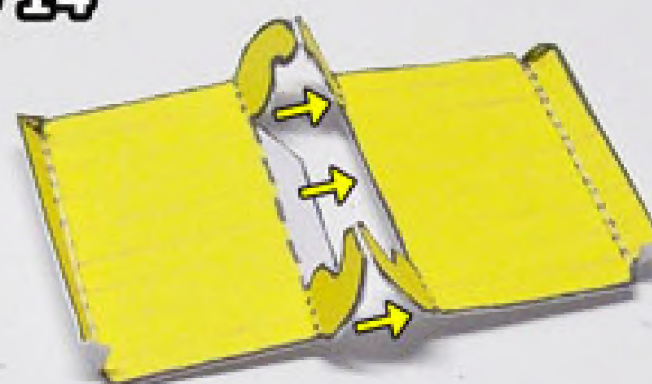

Cut out the hole on part 19, and glue part 20 underneath. Then glue these parts underneath part 17, against part 18.

### step 13

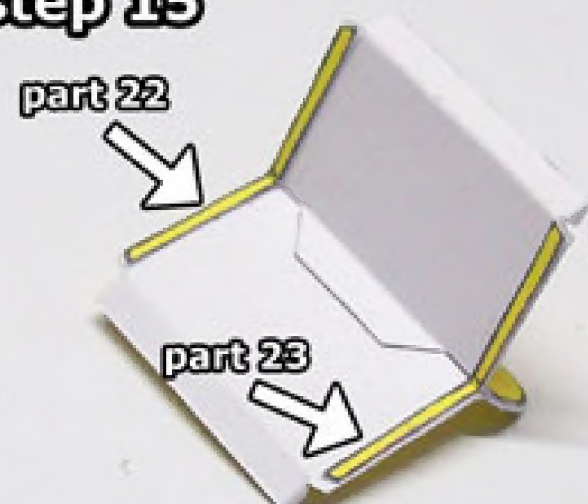

Then glue the dormer to parts 12 and 14 as indicated, and then glue the whole assembly on top of 7 (with the dormer pointing to the front!!)

### step 14

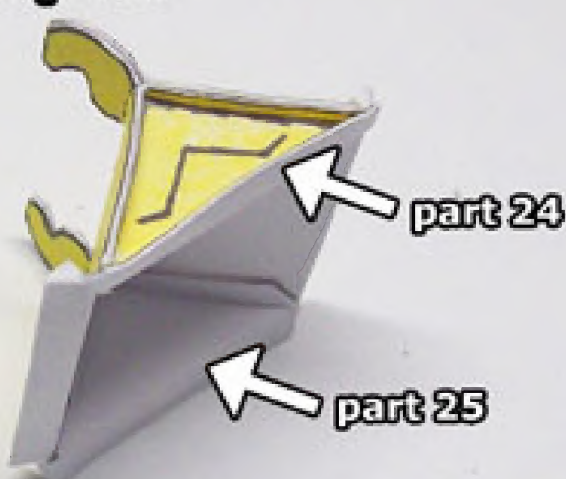

Take note of all the mountain and valley folds on part 20 before folding and glueing it together.

### step 15

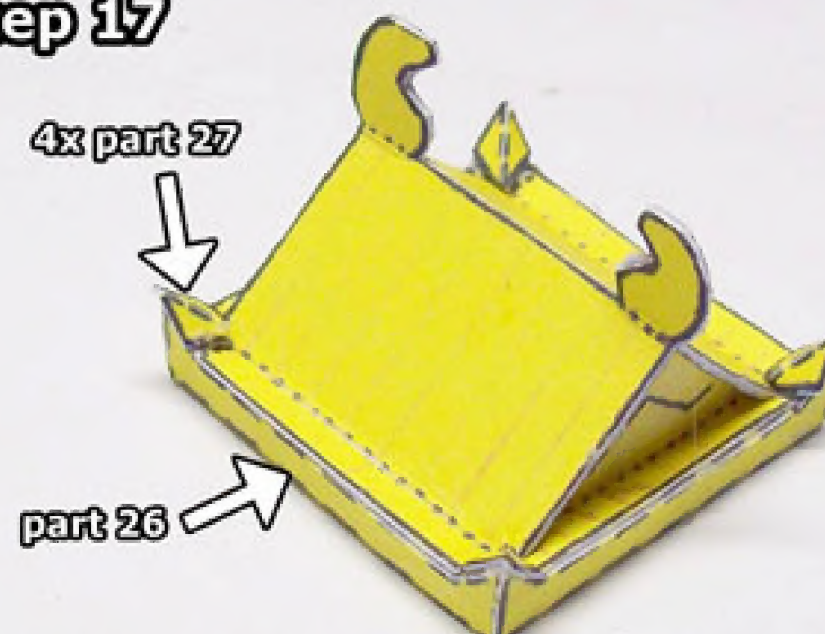

Next, glue parts 22 and 23 to the underside along the edges.

### step 16

Glue parts 24 and 25 underneath the roof along parts 22 and 23.

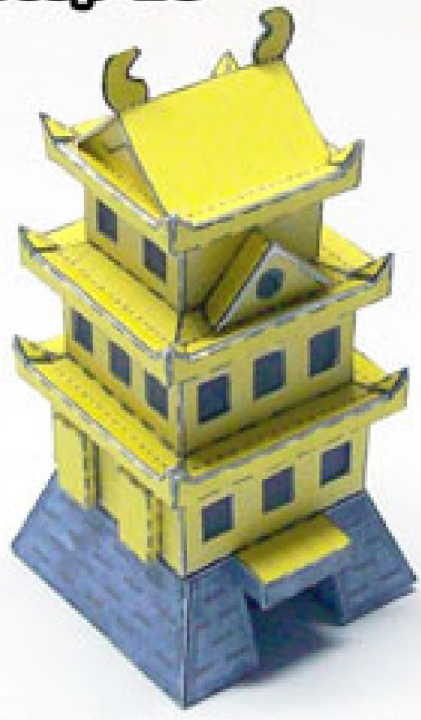

### step 17

Glue the roof on top of part 26 just like the other roofs, and then glue 4x part 27 to the cornerpoints (tuck the ends underneath the roof).

**step 18**

**Yellow Comet  
Headquarters**

**Finally, glue the roof on top of the tower.**

**Thank you for building a Ninjatoes' papercraft model!**
